

ABSTRACT OF THE DISCLOSURE

The present invention provides an alarm clock remote control system and a remote control system with an alarm clock system with alarm clock circuitry that includes: a microprocessor, coupled to the alarm clock activation circuitry, remote IR diode driving circuitry, an internal buzzer, an alarm, a display, and a plurality of input ports and output ports, for providing central control; the display, coupled to the microprocessor, for displaying at least one of: a current time and an alarm time; a speaker, coupled to the microprocessor, the AM/FM radio unit, the internal buzzer, and the alarm, for outputting selected audio; an AM/FM radio tuner, and clock setup circuitry, alarm setup and activation circuitry coupled to the microprocessor for setting the clock, setting the alarm, and activating at least one remote device; and a programmable universal infrared remote device control, coupled to the alarm clock circuitry, for remote programming at least one remote device, and having activation circuitry for activating the at least one remote device.
